

Novalac Reflux

Scientifically formulated for babies with reflux

Infant formula from birth to 12 months

Novalac Reflux is a premium infant formula scientifically formulated for babies with reflux symptoms. Reflux is a common problem for formula-fed babies that can cause discomfort and may interfere with digestion. Novalac Reflux nourishes baby with essential daily nutrients and minerals and is suitable for ongoing everyday use after reflux symptoms have been resolved.

Nutritional Information per 100 mL Novalac Reflux formula (reconstituted at one 4.3 g scoop/30 mL water)

Average Values	Per 100ml prepared feed*		Average Values	Per 100ml prepared feed*	
Energy	64.5	kcal	Vitamins		
	269.5	kJ	Vitamin A	58.5	µg RE
Proteins	1.7	g	Vitamin B1	52	µg
Carbohydrates	7.4	g	Vitamin B2	104	µg
Fats	3.1	g	Vitamin B6	39	µg

Contains: Soy, milk.

Breast milk is best for babies. Professional advice should be followed before using an infant formula. Introducing partial bottle feeding could negatively affect breastfeeding. Good maternal nutrition is preferred for breastfeeding and reversing a decision not to breastfeed may be difficult. Infant formula should be used as directed. Proper use of an infant formula is important to the health of the infant. Social and financial implications should be considered when selecting a method of feeding.
